Open to international relocation | Available for on-site, hybrid, or remote roles

PROFESSIONAL SUMMARY

Full-Stack Developer, Technical Lead, and Senior Engineer delivering enterprise-grade mobile, full-stack, and platform solutions across health-tech, fintech, banking, payments, retail, and government. Strong in Android (Kotlin, Java, Jetpack Compose), iOS (Swift), and full-stack development across React.js + TypeScript + Tailwind front-ends and Node.js + TypeScript backends, on Clean Architecture. Hands-on DevOps and infrastructure leader who designs and operates CI/CD pipelines and on-premise platforms using Jenkins, Docker, Kubernetes, Helm, Terraform, NGINX, Prometheus, Grafana, RBAC, and PostgreSQL. AI-augmented developer working daily with Claude, ChatGPT, Gemini, and Codex. Trusted to ship mission-critical software for clients including Mercola, UOB, Global Payments, VeritasPay, and the Philippine Department of Science & Technology. Open to international relocation.

SELECTED HIGHLIGHTS

- Mobile and full-stack engineering across multiple companies and countries (Philippines, Singapore, Australia, Southeast Asia).
- Currently a Full-Stack Developer at Mercola Consulting Services, building the PAX / Mercola Health Coach 2.0 Android app in Kotlin with Jetpack Compose. Previously Technical Lead at the Department of Science and Technology, leading a cross-functional team reporting directly to the Director.
- Delivered mission-critical software across digital banking (UOB), card payments and POS (VeritasPay, Global Payments, SRDD), and government platforms (DOST).
- Led the migration of a legacy JavaScript POS codebase to Kotlin on Clean Architecture.
- Hired into Lead and Technical Lead roles across multiple companies based on consistent delivery and people-leadership impact.

PROFESSIONAL EXPERIENCE

Mercola Consulting Services LLC *Philippines*

Mar 2026 – Present

Full-Stack Developer (Android, iOS & Backend APIs)

► PAX / Mercola Health Coach 2.0 — Consumer Health-Coaching App

- Build and ship 20+ feature modules for Mercola Health Coach 2.0 (“PAX”), a consumer health-coaching Android app, in Kotlin with a 100% Jetpack Compose UI.

- Implemented a voice-first AI health coach on real-time audio (LiveKit), covering microphone permissions, session handling, and the live transcript UI.
- Developed Food Buddy, a food-logging module using on-device camera capture (CameraX) for barcode, plate, and menu scanning, with insights and daily reports.
- Delivered the clinical surfaces: a conversational health profile, a wellness-assessment engine, and medical lab reports with charts and analytics, rendered across every backend state.
- Rebuilt the Home dashboard and Profile hub design-first on a shared PAX design system, with reusable components and full light / dark theming.
- Built account and security flows: Google sign-in (Credential Manager), app-lock PIN with biometric unlock, identity verification with secure upload, and data-privacy consent screens.
- Engineered on strict MVVM + Clean Architecture (pure-Kotlin domain, repository pattern, Hilt DI, Coroutines / Flow with StateFlow, Retrofit); localized all UI and shipped via Azure DevOps pull requests and peer code review.
- Tech: Kotlin, Jetpack Compose, Material 3, MVVM, Clean Architecture, Hilt, Coroutines/Flow, StateFlow, Retrofit, LiveKit, CameraX, Credential Manager, localization, Git, Azure DevOps.

Department of Science and Technology (DOST) *Philippines*

Mar 2025 – Mar 2026

Technical Lead, Full-Stack, DevOps & Platform Engineering (hired into the role)

- Led a cross-functional team of 4 software engineers, 4 QA engineers, and 78 OJT trainees, balancing delivery, mentorship, and university-partnered training at scale.
- Reported directly to the Director; owned quarterly OKR planning and reporting, technical roadmap, and stakeholder alignment across multiple DOST platforms.
- Defined and enforced engineering standards across the full stack: React.js + TypeScript + Tailwind CSS for front-ends (MVI / unidirectional data flow), and Node.js + TypeScript for backend APIs (MVC + Clean Architecture).
- Designed and operated end-to-end CI/CD pipelines and on-premise infrastructure using Jenkins, Docker, Kubernetes (containerd), Helm, NGINX, Terraform, and Gitea-hosted repositories.
- Stood up production observability with Prometheus and Grafana, hardened access with RBAC, and ran PostgreSQL plus supporting services on hardened Linux hosts.
- Architected ETL pipelines for data movement and DevOps automation across DOST applications, improving release reliability and operational visibility.
- Drove system interoperability by aligning APIs, authentication flows, and deployment topology across cross-agency platforms.
- Authored and maintained technical documentation, runbooks, and architecture decision records to make the platform reliable, auditable, and onboarding-friendly.
- Tech: React.js, TypeScript, Tailwind, Node.js, Express, PostgreSQL, Jenkins, Docker, Kubernetes (containerd), Helm, NGINX, Terraform, Prometheus, Grafana, RBAC, Linux, Gitea, ETL.

VeritasPay *Philippines*

Jan 2024 – Feb 2025

Senior Android Engineer, Team Lead

► **Face-to-Face Payment Terminal App**

- Led the Android team building Kotlin-based payment terminal apps used by merchants for in-person card and QR transactions.
- Owned the JIRA ticket pipeline: scoped work, distributed tasks, and personally resolved high-risk and security-sensitive defects.
- Improved app performance and UI responsiveness on resource-constrained POS hardware while hardening security around payment flows.
- Coached junior developers through pair programming, code reviews, and architecture deep-dives, raising team velocity and code quality.
- Tech: Kotlin, Android Studio, MVVM, Coroutines, Retrofit, Jenkins CI/CD, ISO 8583/EMV-aware payment integrations.

United Overseas Bank (UOB) *Singapore*

Oct 2022 – Jan 2024

Senior Mobile Application Developer

► **UOB TMRW: Digital Banking App (SG / MY / TH / ID)**

- Delivered features and L3 production support for UOB TMRW, a regional mobile banking platform serving customers across Singapore, Malaysia, Thailand, and Indonesia.
- Diagnosed and resolved complex production incidents spanning multiple regional builds, restoring stability for high-volume banking flows.
- Implemented new customer-facing features in Kotlin while maintaining strict compliance with banking security and audit requirements.
- Partnered with QA, backend, and release engineering to ship safe, well-tested updates across four country builds.
- Tech: Kotlin, Android Studio, MVVM, Coroutines/RxJava, Retrofit, Firebase Crashlytics, Git, Jenkins.

Global Payments Inc. *Philippines*

Aug 2020 – Oct 2022

Lead Mobile Application Developer

► **P@TT: Pay at the Table (POS App for Restaurants)**

- Led greenfield development of a POS app with advanced bill-splitting, building it from scratch and migrating the legacy codebase from JavaScript to Kotlin.
- Defined the architecture (Clean Architecture + MVVM), set coding standards, and embedded code-review and testing practices across the team.
- Mentored mobile engineers, reviewed pull requests, and lifted overall code quality on a customer-facing payment product.

► **Gift / Loyalty POS App**

- Built and shipped new modules (e-Gift, loyalty redemption) inside an established Java POS application used by retail merchants.
- Maintained existing POS operations, fixed critical defects, and improved usability and stability across deployed terminals.
- Tech: Java, Kotlin, Android Studio, Clean Architecture, MVVM, REST APIs.

Senior Application Developer

► **Sprout HR: Employee Mobile App**

- Designed and built the Sprout HR Flutter app from scratch, delivering core features such as employee directory and clock-in / clock-out.
- Architected the codebase for clean separation of concerns, testability, and long-term maintainability.
- Mentored a junior developer through pairing and code review, sharing patterns for state management and API integration.
- Tech: Flutter, Dart, REST APIs, Provider/BLoC patterns.

Senior Data Dynamic (SRDD) *Singapore*

Senior Application Developer

► **Sri Sivan Temple: Modular Ordering & Payment System**

- Independently designed and built a plug-and-play Android POS app handling ordering, payments, and receipt printing across multiple companies.
- Integrated Nets payment terminals via USB serial (COM port), Star receipt printers, and Nets QR Payment APIs.
- Engineered the solution as reusable Android libraries so partners could embed it in their own apps with minimal effort.

► **M1 Cashless Payment: Desktop POS**

- Sole developer maintaining and extending a .NET desktop POS, integrating Nets payment terminals and Bixolon printers.
- Improved performance, reliability, and hardware-communication robustness across multiple retail deployments.

► **EyeFly 3D: Cross-Platform Multimedia App**

- Sole developer for both Android (Java) and iOS (Swift 4) versions of an app that converts 2D videos and images to stereoscopic 3D.
- Implemented multimedia processing, 3D rendering, and platform-specific performance tuning; mentored a junior developer.
- Tech: Java, Swift, USB serial communication, custom Android libraries, .NET, multimedia & 3D rendering.

Yondu, Inc. (Globe Telecom) *Philippines*

Mobile Application Developer

- Two-year tenure delivering production Android and Roku applications for Globe Telecom's consumer and enterprise programs.
- **Globe Streamwatch: Remote App**
- Built an Android remote-control app for Roku-powered TVs with firmware update notifications and a smoother UX than the physical remote.
- **Globe Streamwatch: TV Channels App**

- Created a Roku-based TV channel app on BrightScript to manage and monitor user access to new content channels.
- ▶ **Punch Card: Loyalty App**
 - Built a loyalty card application with barcode scanning, reward tracking, and store-availability lookup.
- ▶ **Seats: Restaurant Booking App**
 - Developed a booking platform letting users reserve tables at partner restaurants without calling.
- ▶ **Leader Summit: Event App**
 - Developed a social-style app delivering event updates and private group chat during the Leader Summit.
- ▶ **Globe Labs Caller**
 - Developed an app that displays a company logo during incoming overseas calls for brand-marketing purposes.
- ▶ **OFW Emergency Call**
 - Developed an emergency call app providing free, accessible calling support for overseas Filipino workers.
- ▶ **CMP Pocket Guide**
 - Built an emergency-contact app containing employee contact details for internal corporate use.
 - Tech: Java, Android Studio, BrightScript (Roku), Eclipse, REST APIs.

Earlier Experience [\(2014 – 2016\)](#)

Mobile Application Developer roles at **Majella Global Technologies (Australia)** and **ANVO / Mownecom (Philippines)**. Delivered Android applications including Mi-Track GPS routing, Uhop ride-hailing, and the Lucky 9 mobile card game (C++ / COCOS2D). Owned features end-to-end: design, implementation, backend integration, QA, and release.

CORE COMPETENCIES

AI-Augmented Engineering: Claude • ChatGPT • Gemini • Codex • Prompt engineering • AI-assisted code review, refactoring, test generation, and technical writing

Mobile Engineering: Android (Kotlin, Java) • Jetpack Compose • XML UI • Flutter/Dart • iOS (Swift) • Kotlin Multiplatform (KMP/KMM)

Web & Backend Engineering: React.js + TypeScript • Tailwind CSS • Node.js + TypeScript • Express • REST APIs • Server-side architecture

Architecture & Patterns: Clean Architecture • MVC (backend) • MVI (front-end) • MVVM • MVP • Redux / Unidirectional Data Flow • SOLID • Modularization • Dependency Injection (Hilt, Koin)

Async, Data & APIs: Coroutines • Flow / StateFlow • LiveData • RxJava2 • Retrofit • Ktor • Sockets • REST/JSON/XML • Room • DataStore • SQLite • PostgreSQL

DevOps & Infrastructure: Jenkins • Azure DevOps Pipelines (CI/CD) • GitHub Actions • GitLab CI • Docker • Kubernetes (containerd) • Helm • NGINX • Terraform • Prometheus / Grafana observability • RBAC • Bash • Linux • On-premise infrastructure design • ETL pipelines • Release automation

Quality & Testing: JUnit4/JUnit5 • Mockito • Espresso • Katalon Studio • Playwright (E2E test automation) • Code reviews • Static analysis • Crashlytics

Security & Integration: SSO / Directory services (LDAP / Active Directory) • OAuth2 / OIDC • API integration security • RSA encryption • Token & key management • TLS / HTTPS hardening

Compliance & Standards: HIPAA-aware practices • ISO 27001-aware practices • PCI DSS-aware practices • Data privacy by design • Secure SDLC

Payments & POS: ISO 8583 • EMV • PCI-aware practices • Nets API • USB Serial (COM) • Star/Bixolon receipt printers

Cloud & Backend Tooling: Firebase (App Distribution, FCM, Realtime DB, Crashlytics, Analytics) • Google Maps SDK • Azure DevOps

Leadership: Team leadership • Mentoring • Sprint planning • Code reviews • Stakeholder communication • Agile/Scrum • JIRA • Trello

Repositories & VCS: GitHub • GitLab • Bitbucket • Azure Repos • Gitea • Git workflows (trunk-based, GitFlow)

IDEs & Tooling: Android Studio • Xcode • IntelliJ IDEA • Visual Studio • VS Code

Languages: English (Professional) • Filipino (Native)

EDUCATION

De La Salle – College of Saint Benilde

2010 – 2014

B.Sc. in Information Technology, Specialization in Game Design & Development

- Recipient, Second Honor Certificate (3rd Term, SY 2012–2013).
- People's Choice Award for Thesis 2: "The Enchanted Castle" (SY 2013–2014).

Pasig Catholic College

2000 – 2010

Primary & Secondary Education

CERTIFICATIONS & CONTINUOUS LEARNING

- **Android App Development with Kotlin: Beginner to Advanced (Udemy)** · Mar 2025 ([verify](#))
- **Jetpack Compose: Android App Development (Udemy)** · Mar 2025 ([verify](#))
